user manual

TEAM 12

Intro

This product is designed to run on devices with Android operating systems and can be downloaded from Google Play.

System Requirements

Hookup, devices with Android operating systems must have at least version 4.4. Important reminder: We recommend that you use the latest version of the device to ensure that HookUP's future functionality will be seamlessly used.

Signup

You need a HookUP account in order to have a user profile in Hookup application. After you have entered your Name, Surname, Gender, E-mail address, you need to set a strong password for account security.

Login

After the account creation process, you have to go to the previous page to log in. An email address and password are required for login.

Display All Services on Map

After logging in to the Hookup application, you will see the map showing the services as a marker. There are services shown on the map according to the area they are opened. When you click on marker, you can see information of service. In the second click on marker, you can see more information about the service and if you want, you can apply the service.

Search Service

To find a service that suits you is enough to write the keywords in the search engine. All results related to keyword after search will be listed with their content. By clicking on the services, you can view detailed information about the service and communicate to interested services by sending an email message. Also, you can reach the profile of other user whose service you interested. In the profile, you can evaluate the user or see the evaluation rate.

Create Service

In HookUP you need to make certain definitions to create a service that is related to your business. The fields to be filled in are the name of the service, the description of the service, the type of service, the date of the service, the price, three photographs and the address where the service will take place.

User Profile

While creating an account on the profile page, you can see your username and upload your profile photo. It is also possible to view the services you have created on the profile page. Any error made while creating the service can be edited on the profile page.

Notification

In HookUP, you can see notifications which sent from admin in notification page. Also, when a user interested your service and send a message to you, push notification comes in your phone screen.
